

# The Windows Reading Program at Topeka Collegiate

The Windows Reading Program is a volunteer summer reading program that partners your child with an adult who also has shared in the experience of reading the same book. This shared experience plants a precious memory that will last a lifetime for both adult and child.

Your child and his or her adult reading partner (which could be you, a relative, a neighbor, family friend etc.) participating in the Windows Reading Program should choose a book to read, either from the summer reading list, the recommended reading list, or another age level book. More recommended books can be found at, <http://kids.nypl.org/reading/index.cfm>.

After choosing a book, the child and the adult should read the book separately. After reading, your child should talk to his or her reading partner about each book. The adult should ask questions about the plot, characters, themes, favorite parts etc. When the adult is confident the child has understood the book, the adult and child should fill out and sign the card below. Bring the cards to school with you in August and hand them into Mrs. Allison in the library.

Mrs. Allison will be creating a reading list of all our favorite books!
