

Rising Second Grader Summer Reading and Enrichment Packet

Second Grade Summer Reading

This summer I hope that you will continue reading for fun and learning. I would like you to complete the following reading assignments to help you continue to developing your reading skills all summer.

- Read 20 minutes per day at least 3 times a week. You can read while you are in the car, before bed, or even while you are enjoying the great outdoors. Mark down your reading on the attached reading log.
- Sight Word Practice- Students should have the first 100 Fry Sight words mastered by the start of second grade. If your child has these mastered please move onto the second 100 Fry words. Sight word mastery means that your child is able to read the word in less than 3 seconds without needing to sound it out. You will find a list of ways to practice sight words attached to this packet along with the lists of the first and second 100 words.
- Read *Stink Moody*, *Solar System Superhero* by Megan McDonald. We will start the school year with our Solar System unit. When we return to school we will use this books to help us create a flip book of facts. **Please have your child complete the enclosed fact sheet that goes along with the book.**

Second Grade Summer Writing and Math

- **Math Menu-** Complete as many activities as you are able. Mark the completed activities.
- **Journal Calendar-** Complete 2-3 journal prompts per week on the included paper. Don't forget to use your great handwriting and spacing!

Second Grade Recommended Reading List

The books on this list are suggestions for your child to read and enjoy this summer. They are at a variety of reading levels. If a book is not available easily or above your child's reading level feel free to read it to them or look for it on an audio book format like Hoopla.

1. *Frog and Toad Together Again* by Arnold Lobel
2. *Bringing the Rain to Kapiti Plain* by Verna Aardema
3. *Horrible Harry in Room 2B* by Frank Remkiewicz
4. *Nate the Great and the Snowy Trail* by Marjorie Weinman Sharmat
5. *Calendar Mysteries June Jam* by Ron Ray
6. *Magic Tree House Mummies in the Morning* by Mary Pope Osborne
7. *Flat Stanley* by Jeff Brown
8. *Dear Mrs. LaRue Letters from Obedience School* by Mark Teague
9. *Heidi Hecklebeck Has a Secret* by Wanda Coven

Online Learning

I have attached a comprehensive list of learning websites that can be used to reinforce and build skills. For reading, I highly recommend Epic and for math, Prodigy is fun for kids and great for skill reinforcement.

SIGHT WORD PRACTICE AT HOME

Here are some fun ways to support your child's learning of sight word practice at home. Just 5 minutes a night can make a huge difference!

- **Read the House:** write each word on a Post-It and post them around the house. In order to open the door or refrigerator, your child must say the sight word first.
- **Scavenger Hunt:** go on a sight word scavenger hunt by hiding the words (written on cards) around the house.
- **Password:** make a sight word the 'password' your child must read or spell to you before watching TV, playing video games, etc.
- **Build the Word:** build sight words with magnetic letters, Play-Doh, or beads, macaroni, and more.
- **Shaving Cream Spelling:** spell sight words in shaving cream (it's easy to clean!)
- **Flashlight Fun:** write the words on Post-Its and arrange around the room. Turn off the lights and have your child use a flashlight to find the words and read them aloud.
- **Word Hunt:** challenge your child to find the sight words in environmental print (books, newspapers, cereal boxes, signs, etc).
- **Rainbow Spelling:** your child writes each word, using a different color crayon or colored pencil for each letter.
- **Paper Plate Toss:** write each word on a paper plate. Then use them like Frisbees; your child has to read the word each time they catch or throw the plate.
- **Who Am I?** Lay word cards out and give your child clues to guess the sight word ("it rhymes with...it starts with...")
- **Stepping Stones:** place word cards on the ground or on stairs. Your child has to read the word every time they step or jump on the word cards.
- **Chalk Writing:** go outside and have your child write the words with chalk.
- **Beat the Clock:** how many times can your child write, spell, or read a sight word in under one minute? Or how many sight words can they read in one minute?
- **Go Fish:** create multiple sets of word cards and play Go Fish to find matching pairs!

Name: _____

Date: _____

Stink, Solar System Superhero

Planet Facts

Directions: During or after you read *Stink, Solar System Superhero*, write one fact for each planet in the space below. For more facts on each planet, you may go online to <https://www.nasa.gov/kidsclub>

Mercury	Mars
Earth	Venus
Jupiter	Saturn
Uranus	Neptune

Summer Reading Log

Feel free to track your reading in an app, like Beanstack, if you are doing the Library's Summer Reading Program. We will trade in completed reading logs for a bookmark at the start of the school year.

[illegible]

June Writing Journal

Monday	Tuesday	Wednesday	Thursday	Friday
When you think of summer what 3 words come to mind. Write one sentence for each word you thought of.	If I could do anything this summer I would . . .	My dream vacation is . . .	My favorite snack is . . .	The best thing about summer is . . .
My favorite food is . . .	If I had three wishes, I would wish for . . .	If I were a superhero, I would . . .	Share anything about your day, good or bad.	Friends are important because . . .
My favorite movie is . . .	The thing that I do best is . . .	If I had a million dollars, I would . . .	My family and I like to . . .	Write 5 sentences that tell about June.
Invent a new kind of sandwich. What would it have on it?	Where would you go if you had a hot air balloon?	You find a magic seed and plant it. Write about what happens.	What would it be like to be the tallest person in the world?	What are the best things about a rainy day?

July Writing Journal

Monday	Tuesday	Wednesday	Thursday	Friday
What makes you laugh?	What is your favorite summer sport?	Write a poem about a hot dog.	What I like about Independence Day is . . .	Write about a day at the park or beach.
What is your favorite book and why?	If I found a magic wand, I would . . .	What would you say if you met the President?	My favorite color is . . .	When I grow up I want to be . . .
If I were a bird, I would fly to . . .	This is how to make . . .	Write about going on a magic carpet ride.	If you could invent something, what would you invent?	If it could rain anything, I would want it to rain . . .
I collect (or I would like to collect) . . .	Today is a great day because . . .	My favorite game to play is . . .	Today I feel . . .	You're an astronaut who finds something odd on the moon. What is it?
My favorite subject is . . .	You travel to the jungle to see . . .	Write about an animal that lives in your neighborhood.	Write about something special you did with your mom or dad.	I am excited for school to start because . . .

Eight horizontal lines for writing, located to the right of the rounded rectangle.

Twelve horizontal lines for writing, spanning the width of the page below the first set of lines.

[illegible]This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper appears to be from a notebook or a standard sheet of stationery. There is no handwriting or other markings on the page.

Eight horizontal lines for writing, located to the right of the rounded rectangle. The lines are evenly spaced and extend across the width of the page.

Twelve horizontal lines for writing, located at the bottom of the page. The lines are evenly spaced and extend across the width of the page.

[illegible]

2nd Grade Summer Math Menu

Choose one piece of furniture in your room. Estimate its length in inches. Now measure it. How close was your estimate?	What will you do today? Write out your schedule for the day. Tell what time you will do each thing on your daily schedule. Tell how much time will pass for each item on your schedule.	COUNT YOUR BREAKFAST: Determine if there is an odd or even amount of objects on your plate or in your bowl.	WORKOUT TO 100! Do ten each of the following: jumping jacks, lunges, push-ups, sit-ups, star jumps, high knees, crab walks, run in place, mountain climbers, toe touches.	How many ways can you make 100? Show your thinking using pictures and numbers.
How many different ways can you make 50? Show your thinking using pictures and numbers.	Think of your three favorite characters from a book you like to read. Use them to write story problems. Challenge someone in your family to solve your story problems.	Measure your bed in inches and record how long it is. Now measure it in feet. What can you say about the measurements?	Find a quiet spot in your home. Close your eyes and take deep breaths while you skip count by 5s to 1000. Notice how your body feels when you are finished.	Design your perfect pizza! Imagine which toppings you would like on each half or quarter of the pizza (ANYTHING goes!). Ask someone in your family to do the same. Compare what you each decided on.
Do jumping jacks while you skip count by 10s to 1000. Notice how your body feels when you are finished	Imagine what your perfect school day would look like. Create a schedule of everything you would like to do. Write what time each activity would take place and for how long. Share it with someone in your family.	Choose three different numbers between 0 and 9. How many three digit numbers can you create? Choose two of your creations and add them together.	Choose your favorite number between 100 and 200. How many number sentences can you create?	Choose three different times of the day to look out your bedroom window. Record the time and what you notice. What is different? What is the same?
Take a walk around your house. Do you see fractions anywhere? (Windows are a great place to start). Make a list of fractions you see. Try to draw a picture and label each fraction.	WORKOUT TO 100: Do jumping jacks counting by 2's, all the way to 100. Then do toe-touches counting by 5's all the way to 100. Then do push-ups counting by 10's all the way to 100.	How many ways can you make \$100 using pennies, nickels and/or dimes.	Create your own restaurant at home! Write a menu with your favorite foods and how much they cost. Invite your family to come to your restaurant.	Take a piece of paper and fold it in half. Label each half. Then fold it in half again. What happens? Can you label the parts? Fold it in half again? What happens? Can you label the parts now?
Make a list of different 2-digit numbers. Then make addition and subtraction problems using those numbers and solve them.	COUNT YOUR LUNCH: Determine if there is an odd or even amount of objects on your plate or in your bowl.	Grab a piece of chalk and find a safe spot outside with your grown up. How many number sentences can you write?	Record as many ways as you can think of to make 50 cents using pennies, nickels and/or dimes.	Make a list of all of the items you would use a ruler to measure. Then make a list of the items you would use a yardstick to measure. Then make a list of items you would use a measuring tape to measure.

2nd Grade Summer Math Menu

Find three of your favorite stuffed animals in your house. Now write a story problem about them. Solve your story problem.	Nicely ask your grown up for a snack you can count (gold fish, crackers, pretzels, raisins, grapes, berries, cheerios... anything!). Can you split your snack into halves? Thirds? fourths?	Run in place as fast as you can while you skip count by 100s to 1000. Do this 10 times. Notice how your body feels when you are finished.	Imagine what your perfect summer day would look like. Create a schedule of everything you would like to do. Write what time each activity would take place and for how long. Share it with someone in your family.	Find a recipe in either a cookbook or online. Record the fractions you see.
Set a timer for 10 minutes. Imagine you have 10 coins in your pocket. Make a list of all of the different amounts of money you could possibly have in your pocket.	Choose your favorite number between 500 and 1000. How many number sentences can you create?	Choose one piece of furniture in your room. Estimate its length in feet. Now measure it. How close was your estimate?	Think about the amount of people in your home. How many eyes do you have all together? How many fingers? How many noses? How many toes? How many teeth?	Set a timer for 10 minutes. See how many items you can measure in your house using inches. When you're done, compare different objects. How much longer is one object than another?
Create your own store at home! Decide what kind of store you want to have, what you will sell, and how much everything will cost. Invite your family to come to your store and go shopping.	Go on a 3-D shape hunt. Record all of the objects you find that are cylinders, cubes, rectangular prisms, cones, spheres, prisms...etc.	Find a collection of items (coins, toy cars, pencils...) and try separating that collection into two equal groups. Then try three equal groups. Then try four equal groups. What do you notice?	COUNT YOUR DINNER: Determine if there is an odd or even amount of objects on your plate or in your bowl.	Go on an array hunt in your home and out your window. Record all of the arrays you see, and be sure to mark the amount of rows and columns, and how many in all.
Fold a piece of paper in half. Draw half of a picture on one side. Then, make the other side it's mirror image (make it symmetrical).	Keep an eye on the clock today. Record the different activities you do throughout the day. Record the start and end time of each activity, and show how much time elapsed during each one.	WORKOUT TO 100! Run in place while you count all the way to 100. Notice how your body feels when you get to 20, then 50, then all the way to 100.	Find a take out menu in your home or online. Select an appetizer/side and your meal. Find three things you would like to have. Decide which bill (\$1, \$5, \$10, \$20) you would use to pay for it. How much money would you get back?	Think about the ages of different people in your family or home. Use symbols $<$, $>$, and $=$ to make number sentences comparing people's ages.
Fold a piece of paper in half. Label one side 2-D and one side 3-D. Then, find a comfortable spot in your home where you can look out the window. Keep a look out for people and animals. Count how many legs you see (counting by 2's or 4's)	Count how many doorknobs, mirrors, and light switches there are in your home. Write a number sentence to show your total. The number sentence should include 3 addends and 1 sum.	Find a comfortable spot in your home where you can look out the window. Keep a look out for people and animals. Count how many legs you see (counting by 2's or 4's)	Find a pair of pants or a jacket with two pockets. Try putting an amount of something in one pocket, and then put the same amount in the other pocket. Record how many you have all together.	Find a collection of items in your house. How can you arrange that collection into different arrays? (Arranging in rows and columns.)

Optional Activities to Grow Your Imagination, Problem-solving, and Creativity

DESIGN & BUILD SOMETHING WIND-POWERED

Possible Supplies:

toothpicks, skewers, glue, twist ties, zip ties, gears, washers, cardboard, craft paper, foil, rubber bands, cotton swabs, paper rolls, craft sticks

DESIGN & BUILD A NEST

Possible Supplies:

raffia, ribbon, twist ties, zip ties, twigs, toothpicks, cotton, feathers, pinecones, fabric, string, twine, leaves, grass

DESIGN & BUILD A STRUCTURE TO KEEP OUT THE RAIN

Possible Supplies:

straws, skewers, wood blocks, aluminum foil, washi tape, duct tape, medical cloves, balloons, plastic wrap, glue, toothpicks, rubber bands, twist ties, zip ties

DESIGN & BUILD A BIRDHOUSE

Possible Supplies:

wood slats, twigs, glass marbles, glue, nails, hammer, skewers, twist ties, rubber bands, flowers, foil, Washi tape, duct tape,

DESIGN & BUILD A WHEELBARROW

Possible Supplies:

Wood slats, toothpicks, skewers, washers, foil, duct tape, gears, cardboard, craft paper, twist ties, zip ties, rubber bands, craft sticks

DESIGN & BUILD A SHOVEL FOR SCOOPING DIRT INTO YOUR WHEELBARROW

Possible Supplies:

straws, skewers, wood blocks, aluminum foil, washi tape, duct tape, plastic wrap, glue, toothpicks, rubber bands, twist ties, zip ties, scissors
